Office Action

Restriction Requirement:

Applicants' election of Invention I, now represented by claims 1-25, in the paper of paper number 8 (9 December 2002) is acknowledged.

Upon further consideration, a second restriction is deemed necessary. Further restriction *within* the formerly presented Invention I is required, as follows:

Applicant is required to elect one sequence from the following:

- a) SEQ ID NO: 1, or
- b) SEQ ID NO: 3

The inventions are distinct, each from the other because of the following reasons:

Each set sequence represents a patentably distinct invention. SEQ ID NO: 1 and 3 are independent and distinct, each from the other, because they have different putative functions, different structures, and require completely different search terms, starting points and strategies.

Because these inventions are distinct for the reasons given above and the search required for each group is unique, and because each nucleic acid of requires a completely separate search,

Art Unit: 1647

as well as by their different classifications, divergent subject matter and different search requirements, restriction for examination purposes as indicated is proper.

In response to this requirement, applicants must elect from Groups (a) - (b). Applicant is advised that in order for the reply to this requirement to be complete it must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(i).
